

What is Docker

Isolated environment

- Libraries, application, runtime and dependencies

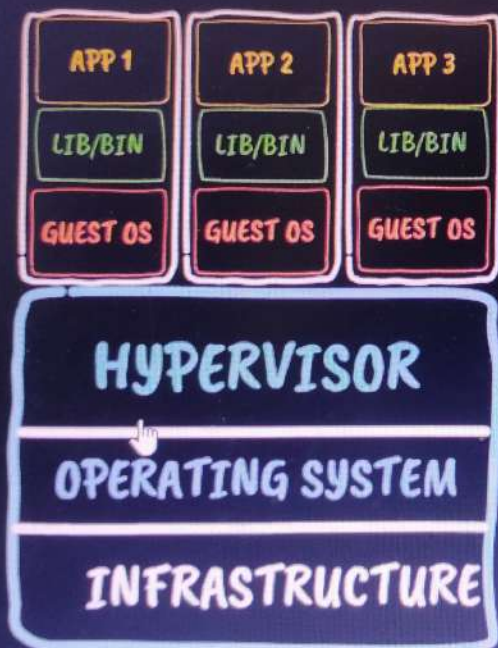

lightweight sandbox environment

Everything that is required to run an application

Understanding Containers V/S Virtual Machines

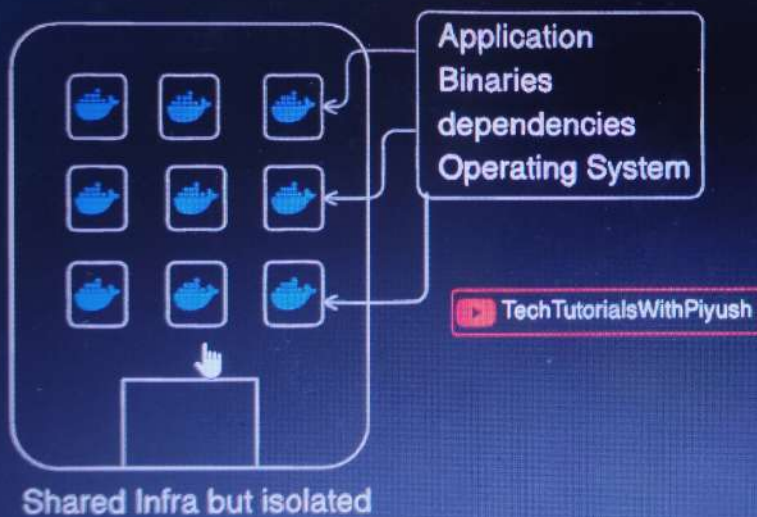

VIRTUAL MACHINE

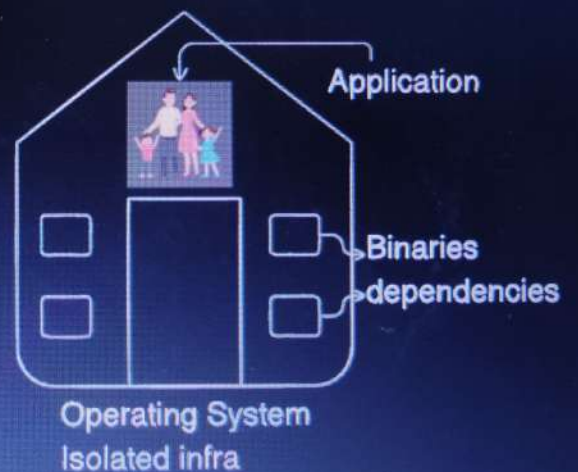

CONTAINERS

Containers V/S Virtual machines with the help of a Building and House analogy

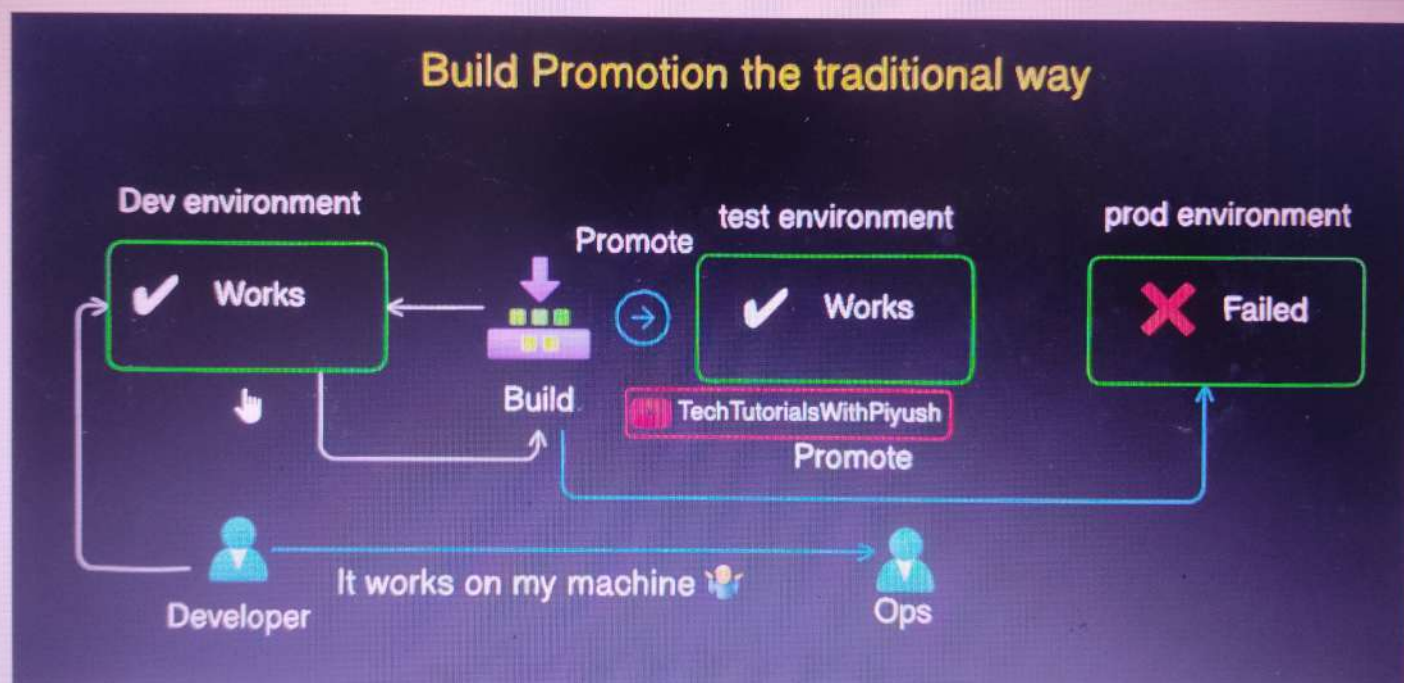

Containers (Building)

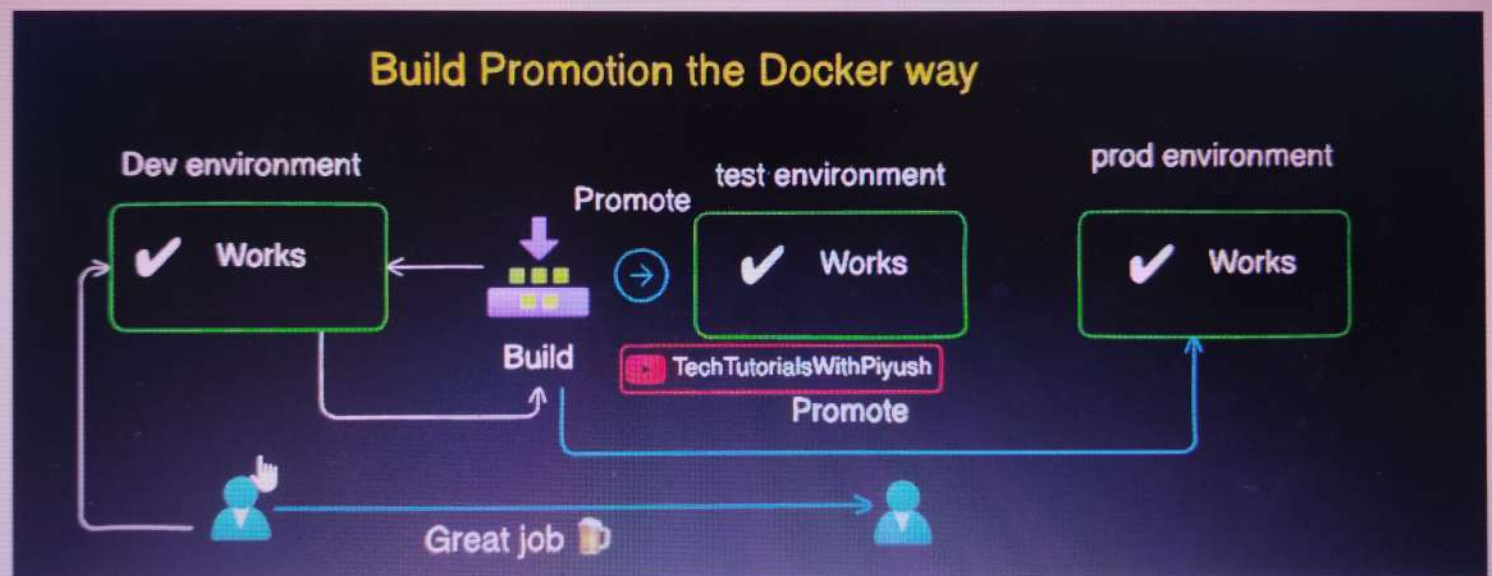

Virtual Machine (House)

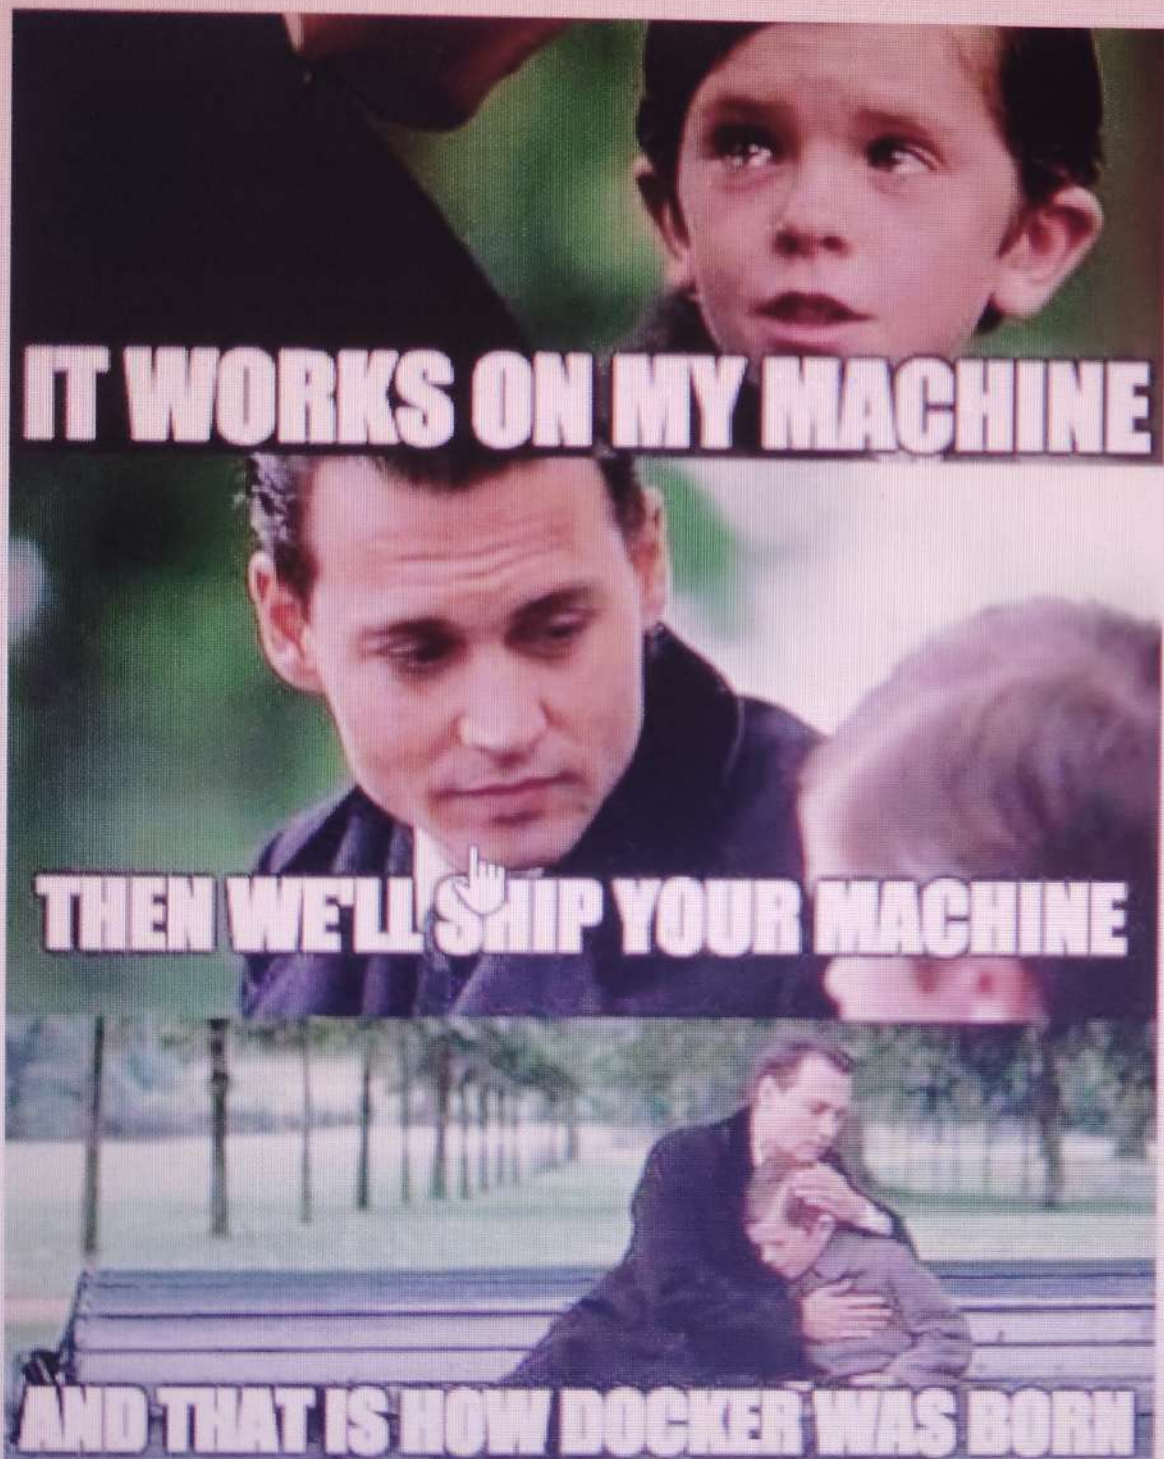

Challenges with the non-containerized applications

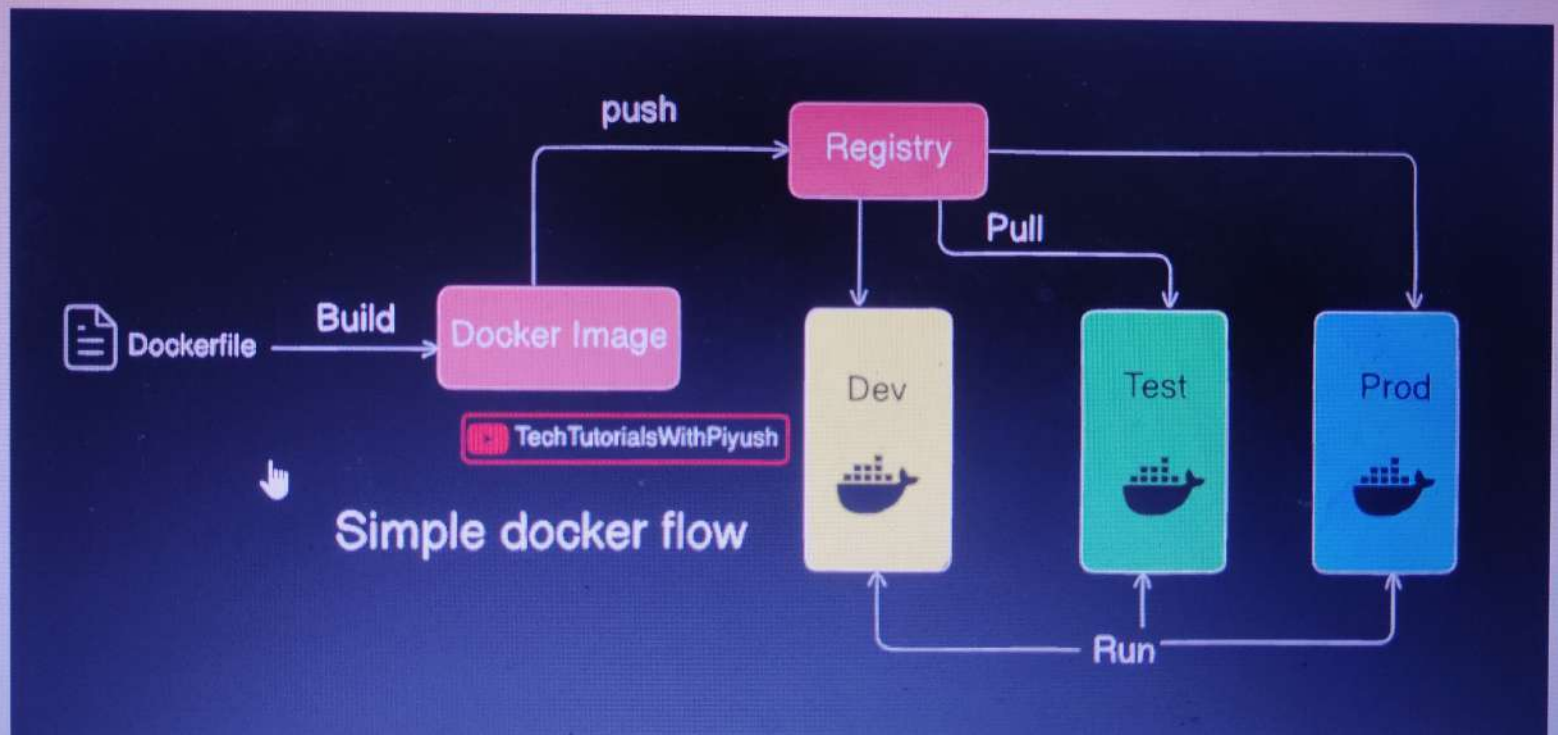

How Docker solves the challenges

That's how docker was born(Just kidding!)

A Simple Docker WorkFlow

Docker Architecture
